News from the Stars: &c.

OR AN

EPHEMERIS

For the YEAR, 1681.

Astrological Judgements upon the several

Eclipses, Motions, and Conjunctions of the Planets

that happening therein.

Being the first from the Discovery or Learning of

And from the Creation of the World

Years.

WHEREIN

You have a perfect, and true Account of the most material Matters and Things presented by the *Heavens* to be manifested in the WORLD in the same Year.

By WILLIAM ANDREWS

Student in *Astrology*.

Os homini sublime dedit, cœlumque videre
Jussit, & erectos ad sidera tollere vultus.

Ovid. lib. 1. Metamorph. ver. 85. &c.

LONDON:

Printed by *J. G.* for the Company of *Stationers*, 1681.

THe following Book of Schemes, is Calculated to every second Degree of the mid Heaven, and serves for the Latitude of the Honourable City of *London*; where the Pole-Artick is Elevated 51 Degrees, 32 minutes, and the next Table following, to the right Hand, is a Table of the Suns right Ascension fitted to the said Book of Schemes. Now in the next place, I will shew you how to set a Figure by the Schemes and Table. Thus I demand a Figure *January* the second, three hours past Noon; Example, *January* the second, the Suns Right Ascension is 19 hours and 39 minutes, and the former 3 hours being added, makes 22 hours 39 minutes; I look amongst the Schemes, and find 22 hours 38 minutes, which is the neareſt, &c.

Astrologia altissima Scientiarum est, cum quia de Cœlestibus, tum quia de futuris, quorum Scientia non datur aliunde est sed etiam utilissima.

To the Reader.

THE Year 1680 is expiring, 1681 is coming upon us (of the which I do here write) 1682, and 1683 do now draw nigh, in which Years there will happen Three *Conjunctions* of the Two *Superiour* Planets, *Saturn* and *Jupiter* in *Leo*, within the ſpace of Seven Months, whoſe Effects (many do conceive) will be of very great Concernment unto the World——.

The *Major* part of *Europe* at the writing hereof, ſtands in a pretty peaceable poſiture. Pray God it may ſo continue——

Pax eſt dulciſſima rerum.

Some places beyond the Seas, in the Emperour of *Germany*'s Dominions, have been lately much afflicted by the Plague. God grant it proceed no further——

Let us pray for the Peace and Proſperity of *Chriſtendome*, for Unity and Concord amongſt our ſelves; Let us fear God, and honour the King; ſo ſhall we be a happy People——

Auguſt the 2d. 1680. *Will. Andrews.*

The Use of the Two ensuing Tide-Tables.

TO find the time of Full Sea, or High Water in any of those places mentioned in the two ensuing Tide-Tables you must observe, First, the Age of the Moon, which you may easily find in the next following Table, wherein you have the Moons Age every day throughout this Year, 1681 and having therein found out the Moons Age, according to those directions mentioned for that purpose, in the side of the said Table: Then have recourse unto the said Tide-Tables, and look for the place desired, in the Head of the said Tables, with the Age of the Moon, in the Column under the Title of the Moons Age, and in the common Angle or meeting of those Lines in the Col. under your Place, you shall have the time of High Water in hours and minutes.

Yet Note, that the Tides do not always fall out exactly at the time found in these Tables, by reason of the difference of the Moons Latitude, High Winds, and floods, &c. which very often alter the time, yet this is the exactest Rule that can be given for the finding of them.

A TABLE *of the Moons Age every day throughout this Year,* 1681. *whereby with the help of the ensuing Tide-Tables, the time of High-Water and Full Tide may be found in those places there inserted.*

Days	January	February	March	April	May	June	July	August	September	October	November	December

THE year 1681 now begins, God grant it may begin and end well. And be propitious thereunto all *Christendom*. The Effects of some important Configurations of the Stars in *December* 1680 may (perhaps) not yet be ceased in some Northern Countries. Froward and perverse Spirits (perhaps) are busie, though to their own detriment. *Jupiter* having been for some time Retrograde in *Gemini*, now becomes direct in Motion, and *Mars* becomes Retrograde in *Virgo*. The Heavens appear in an indifferent serene posture now, and a Time of no great Action. However many Reports abroad about the present Transactions of some Nations, and towards the *North* and *North-East* somewhat of consequence seems discussed of. Some piratical Actions disturbs the Merchants and Seamans imployment of some Countryes, and Storms at Sea now and then in this Month, puts some Ships in danger. Sundry Reports from *Holland*, *Zealand*, *Scotland*, *Jamaica*, *Barbadoes*, &c. some parts of *France*, *Venice*, and some of the *Turks* Dominions. Weighty Matters are in agitations in sundry parts of *Europe*, and some things in the World (of importance) stand but dubiously.

It's probable we shall have a great quantity of Snow in this Month.

New Moon the 8 day, 51 min. past 11 before noon.
First quarter the 15 day, 40 min. past noon.
Full Moon the 22 day, 9 min. past 11. before noon.

28	c			20 42	♐ 26	Sun sets 5. 39.

SOme Nations Affairs meet with some Difficulties ——— yet Matters are in a better Posture in sundry Places, than now reported; Though (perhaps) some Sturdy and Untruly Actions, may near this time, be ready to appear in some Neighbouring Countreys, ——— A time of sundry Reports, some true, and some false ——— No great Unity betwixt some *European* Nations. Sudden Storms at Sea again in this Month, especially *Southward, &c.* ——— The Souldier begins to be Active in several Parts of the World, and some Matters of a Martial Nature seem to be in Agitation. Much Talk about Sea Negotiations ——— The *Effects* of the *Stars* in this Month, seem to be of pretty considerable Importance, unto those *Countreys* and *Places* under *Virgo* and *Pisces* ——— Some People seem hastily and rashly disposed, contentious, and quarrelsome, *&c.* ——— perhaps Skirmishes, Commotions, or some Battel may happen in some Parts of the World, subject to the two beforementioned *Constellations* of *Heaven.* ———

Perhaps some Claps of Thunder, &c. may happen in some Places, about the last week of this Month.

March

Last quarter the 2 day, 48 min. past 8 in the morning.
New Moon the 9 day, 46 min. past midnight.
First Quarter the 16 day, 48 min. past 6 afternoon.
Full Moon the 24 day, 27 min. past 1 in the morning.

THE *Spring* begins ——— Mens minds are various and unconstant ——— Some people are peaceably inclin'd, others not so ——— Many Rumours still abroad, touching the various concerns of some Nations ——— Some Countries being not in such a setled condition as might be wished ——— Some *Configurations* in this Month are of an amicable disposition, and some appear otherwise. From Foreign Countries comes much News. Cross and unpleasant Designs now on foot *Eastward*, or *North-East*. Eminent Debates and Consultations appear in some Countries, and some Nations are very busie in carrying on their Affairs, and if the present designs and transactions of some Nations and People under *Aries* and *Cancer*, be of a quiet and peaceable nature it will do well ——— *Saturn* becomes now direct in Motion, and the *Sun* and *Mercury* come unto a Quadrate Aspect of him ——— *Germany*, *France*, *Denmark*, *Swieden*, *England*, *Scotland*, *Holland*, *Zealand*, *Venice*, and some part of the *Turks* Dominions, seem hinted at by the *Configurations* of the Stars this Month.

There will be now and then in this March *cold storms of* Hail *and* Rain, *or some* Snow.

Last quarter the 1 day, 18 min. past 3 morning.
New Moon the 8 day, 6 min. past 11 before noon.
First quarter the 15 day, 47 min past 1 morning.
Full Moon the 22 day, 32 min past 4. after noon.
Last quarter the 30 day, 37 min. past 4 after noon.

MARS now becomes *direct* in *Motion*———Some Nations are full of Business, their Actions and Designs somewhat fickle, and uncertain, inclining unto War———Matters of Importance fall now under Consideration, in some Countries not far off———The Stars in this *Month* are pretty moderately disposed, and the *Configurations of Heaven* are of a pretty calm, and mild Nature———New Leagues at hand, and many sober and prudent persons are endeavouring to cause a right Understanding to be continued, betwixt some *European* Nations; notwithstanding some Difficulties which (perhaps) may at this time be almost ready to be manifested amongst them———Some persons are better satisfied than formerly, and are labouring to compose some unruly Passages——A time of good Trading. Many Ships arrive, to the Content of the Merchant, and the *Citizens* of *London* seem to prosper———

The Spring seems to go on pretty comfortably, and favourable for ought I can discover.

May

New Moon the 7 day, 14 min. past 7 after noon.
First quarter the 14 day, 50 min. past 9 in the morning.
Full Moon the 22 day, at 8 in the morning.
Last quarter the 30 day, 44 min. past 8 in the morning.

THis Month [illegible] may for the most part prove pretty serene.——A time of no great action, though many important businesses are discours'd of.——Many Treaties on foot, and pretty good correspondence seems to continue betwixt some *Nations* and *People*, whatever may be feared to the contrary.——The *Heavens* are now of a pretty favourable and propitious signification, as unto the affairs of some Countries; and here appears in this Month no rough aspects of the Stars, only towards the Months end, there happens a *Quartile* of the *Sun* and *Mars* in *Gemini* and *Virgo*.——Peace and Unity seems the only thing desired by many well minded people; but some turbulent Spirits are not wanting to promote troubles.——Good News from divers Countries and from Sea, the affairs of the *Poles* in a good condition.——The French seem busie.——*Flanders*, *Brabant*, and *Spanish Netherlands* somewhat concern'd at this time.——Divers things of consequence are under debate, the minds of men however seem pretty well settled and composed at present.——May the City of *London* be free from all casualties and distempers of this Month, and the next, and for evermore——. Towards the *West* a somewhat of importance is manifestation.——

Thunder and Lightning in this Month, especially towards the end thereof, &c.

New Moon, the 6 day 10 minutes past 1 morning.
First Quarter, the 12 day, 56 min. past 8 afternoon.
Full Moon, the 20 day 48 minutes past 10 at night.
Last Quarter the 28 day, 27 min. past 6 afternoon.

THE *Consultations* and *Debates* of the other *Month* past, now (perhaps) may break forth into action, ——and *very material things* may appear in some *Northern* and *North East* parts of the world by *Land* and also at *Sea*, yet *Jupiter's* presence in *Cancer* now seems to be of a good signification, unto those *Countries* and *Places* under that *Constellation*.——The *effects* of the *Stars* in this *Month* are very few, and those that are, are of an *amicable* nature and disposition: Here is only a *Conjunction* of the *Sun* and *Saturn* in *Cancer*. ——However some people seem unsettled, and and some *Nation* or *Nations* not very well pleased. ——Discontent (perhaps) amongst some eminent persons in the world, and some *Countries* and *Cities* affairs under *Cancer*, perhaps, meet with some difficulties.——Action in the *Turks* dominions, (or now in hand by those people) of importance.——The *Venetian* reconciled.—— The Pyrates of *Algiers*, *Tunis*, *&c.* may, perhaps, be now met with all, and be made to smart for their miscarriages.——Some *Sea* action or *News* from *Sea*, as also from some Neighbour Country or Cities, relating something of consequence; perhaps we may hear of some skirmishes or Conflicts,——

Very wet and cool unsettled weather, about the first week of this July, *if not some Thunder also, &c.*

New Moon, the 3 day, at 5 in the afternoon.
First Quarter, the 11 day, 6 minutes past 8 morn.
Full Moon, the 19 day, 23 minutes past 2 morning.
Last Quarter, the 26 day 16 minutes past 8 morn.

A Type of the Moon's Eclipse *on the nineteenth day of this* Month, *about half an hour after two in the morning. Perhaps it may prove* Total.

Saturn passeth out of *Cancer* into *Leo* at the beginning of this month, *viz.* on the fifth day thereof; whose presence in *Leo*, may be er'e long of great concernment unto the world.——— Many aged people dye, and some *Saturnian* persons begin to think of changing their habitations, being angry and dissatisfied: However, all the Planets in this month are very friendly disposed, except *Saturn* and *Mars*; who now come to a *Quartile Aspect*.——— Some quarrels may in this month appear or rash and unruly actions may attend some places. Rumors of War, Commotions, or variety of business in some parts of the world, under *Leo* and *Scorpio*.——— Yet the heavens seem now to import a pretty calm time to some places, notwithstanding all difficulties, fears, and jealousies.——— The motion of some Army or Armies, the Soldier in some Countries seems *Active*, and some *Martial Affairs* of consequence, may now appear where Armies are on foot.———

I do conceive we shall have pretty good harvest weather for the most part of this month, unless it be about the middle thereof.

New Moon, the 2 day, 46 minutes past 2 morning.
First quarter the 9 day, 10 minutes past 8 at night.
Full Moon, the 17 day, 8 min. past 4 afternoon.
Last quarter, the 24 day, 6 minutes past 1 afternoon.

MOre ſerene and moderate actions (in all probability) than in ſome Months paſt, and perhaps, ſome Nations and People ſeem better and more quietly diſpoſed than formerly.—— Here is at preſent a pretty moderate and favourable poincture of the Stars.——Some turbulent ſpirited people ſeem ſomewhat calmed, and the affairs of ſome *neighbouring* Countries ſeem at this time pretty well ſettled and compoſed, though many diſcourſes are abroad, as if ſome unquiet actions did ſtill continue in ſome foreign parts.—— However the *Heavenly Bodies* do in ſome meaſure foreſhew, that ſome *National* Controverſies are in a fair way of Reconciliation, and that ſundry debates of publick concernment are near a happy concluſion, whatever may be at ſome time in this month ſuppoſed, or expected to the contrary —— And this moſith may prove, perhaps, of ſomewhat a propitious nature, both unto *Land* and *Sea* affairs, in ſundry parts of the world, to the great content and ſatisfaction of all thoſe perſons who delight in peace and quietneſs.——

Moderate and ſeaſonable weather for the moſt part of this month.

October

New Moon, the 1 day, 12 min. past 2 afternoon.
First quarter the 9 day, 23 min. past 4 afternoon.
Full Moon, the 17 day, 7 min. past 4 morning.
Last quarter the 23 day, 4 min. past 8 at night.
New Moon, the 31 day, 46 min. past 6 morning.

THere happens many aſpects of the Stars in this month, and the Stars ſeem buſie, but they are rather friendly diſpoſed than otherwiſe.——— A time of much news and many reports from foreign Countries, touching ſome weighty tranſactions now, or not long ſince on foot ——— *Italy*, ſome part of the *Emperor*'s Countries, *Norway*, *Hamburg*, and ſome other places under *Leo*, *Libra*, and *Scorpio* are ſomewhat hinted at.——— Yet no great action at this time ſeems ſignified, notwithſtanding all various reports. ——— Much news from Sea, which if to the ſatisfaction of the Merchant it will be well: Some ſtorms may be expected there in this month, and we ſhall (it's to be feared) hear of the loſs of ſome ſhips, occaſioned by *high winds* and *boyſterous weather*.——— Some people ſeem diſſatisfied, and do murmur and repine, and fears and jealouſies attend ſome places. ———Something of importance from the *North*, and *North East* parts ſeem diſcourſed of.——Sundry reports from *Holland*, *Scotland*, *Germany*, *Italy*, and other places.———

Pretty cool weather at ſome time in this month, a very high wind in the firſt week, &c.

THe two *Superior* Planets, *Saturn* and *Jupiter*, become *Retrograde* in this Month, the one being in *Leo*, the other in *Cancer*. ——Some considerable matters in the world, not long since, somewhat vigorously carried on, seem now not so, but rather at a stand; and divers fair *Overtures* and smooth passages appear betwixt some *European* Nations. ——However we find *Mars* and *Jupiter* coming to an *Opposition* about the end of this *month*, the one being in *Capricorn*, the other in *Cancer*. ——Some things, perhaps, stand but dubiously in those Countries and Places under those *Constellations*, and divers reports seem spread abroad, touching the present affairs and designs in some *Northern* and *Southern* parts of the world. ——Some *Saturnian* and *jovial* persons seem not well pleased at the proceedings of these times. ——Yet here is signified little or no action now, though some *Martial* Negotiations may be on foot still in some places.

Suitable weather in this November, *for the time of the Year.*

IF the effects of the late Oppoſition of *Jupiter* and *Mars*, do not operate about this time in ſome place or places Northward and North-Eaſt from *England*? The calm and quiet condition of the Celeſtial Bodies in this month, gives hopes of a pretty ſtill and ſerene time now, as unto the publick buſineſſes of the world; and that the year will end moderately, notwithſtanding all former proceedings.——Few or no conſiderable *Configurations* now appear, only the *Sun* and *Jupiter* are in *Oppoſition*.——It's probable that the minds and diſpoſitions of ſome Nations and People, and their affairs, ſeem better compoſed than in ſome Months paſt; and not ſubject to any great difficulties.——The preſent condition of ſome Nations being not very unſettled, and the general affairs of the world are now pretty ſmoothly carried on; and ſome people who have been of a thwarting nature, become, now perhaps, of another temper; ſo that this year doth ſeem to end well, which *God Almighty Grant*; *Amen*.

Favourable Weather in this Month.

Astrological Judgment, For the Year 1681.

By William Lilly, Student in Astrology.

IN treating of the Accidents of this Year 1681. and Fortunes of the Stars therein; The late Conjunction of Saturn and Mars in Cancer, on the 20. day of August last in 1680. ought to be considered; because much of its Effects (its probable) will be manifested in some parts of the World, in this present Year 1681.

True it is, In my last Years Almanack I did briefly mention something concerning the said Conjunction, as it may very well be remembred by those that perused the same; what I there wrote thereof, I shall here repeat, being in these following words, viz. "We are to take notice, that in this "Quarter (being the Summer of 1680.) there is a Notable Con-"junction of Saturn and Mars in Cancer, viz. on the 20 day "of August, which Conjunction seems to have very material "significanon. It happens in a Watry sign, and therefore "its influence will be manifested at Sea, and upon the Wa-"ters, amongst Fishermen and Seamen, &c. — Those places "under that Constellation herein before-mentioned, may be "sensible of its Portents both at Sea and Land. It doth seem "to import, that some people will be passive, either by "War, sickness, depredation of Enemies, Sea-fights, &c. "Many hasty showers of rain at unseasonable times, or too "much moisture: Inundations, or over-flowings of the Sea "Banks Northward, or Northeast: Fleets at Sea much dama-"ged by storms, or contrary weather, others battered by "the Enemy, strange Shipwracks, &c. — if not some unruly "passages Northward — Thus far I proceeded the last year, upon the Effects of the said Conjunction; unto which we may here now add, that seeing the said Conjunction of Saturn and

Mars hapned in *Cancer*, a Conſtellation of a violent nature, and thoſe two Planets being alſo of themſelves of a malevolent diſpoſition, it may in ſome meaſure be feared, that ſundry unruly, raſh, and unquiet Actions may during the *Effects* of the ſaid *Conjunction*, be manifeſted or carried on, in many of thoſe Countries and places under the aforeſaid *Conſtellation*: And that in thoſe *Regions* and *places* ſubject to the ſame, there will appear (perhaps) in this year 1681. ſundry caſualties and enormities of the Nature of thoſe Two Planets; and if thoſe parts of the World, under the aforeſaid *Conſtellation*, be free from War and its Attendants, ſickneſs, ſcarcity, and all *Saturnian* and *martial* Evils and Miſchiefs in this year 1681. it will be well ———

I do proceed and ſay, that from hence ſeems ſignified, ſundry difficulties to happen in the *publick Affairs* of thoſe *Countries* and *Cities*, unto which this ſaid *Conjunction* hath relation ——— It alſo foreſhews, many Piracies to be committed upon ſome Seas, if not ſome Claſhing at Sea betwixt ſome Nations, Controverſies or ſtrong debates about Religion in ſome *Countries*, or about Sea Negotiations; The fare in fiſhing and ſetting out of Ships and Navies, and ſuch like buſineſſes, relating unto *Marine* Concernments: Moreover, ſome loſs may happen in the fiſhing Trade unto ſome people uſing the ſame, and the induſtrious Seamen may in their Imployments, (perhaps) meet with ſome material obſtructions. Alſo ſome Skirmiſhes, Commotions, or tumultuous proceedings, may appear in ſome places ——— Murmuring and repining amongſt ſome common people of ſome Nations, whoſe behaviour may perhaps prove rude and ſturdy ——— and ſome turbulent Spirits may be active, endeavouring to promote diſturbances (if poſſible) though to their own ruine and vexation ———

Beſides, there ſeems thereby further ſignified, that ſome people *Northward* or *Northeaſt*, may be ſenſible of ſome conſiderable loſs by ſome ſudden flood or floods, or the breaking in of the Sea amongſt them, which God prevent ———

Cancer is the only Houſe of the *Moon*, whence a learned *Author* hath delivered his opinion touching ſuch a *Conjunction* therein

therein as followeth, viz. [illegible] determinibus Concursibus quæ in Cælo fiunt, [illegible] Saturni & Martis in Cancro: quoniam Saturnus vadit [illegible] Mars [illegible] & Saturnus corrumpit effectus Lunæ, quæ habet dominare & Mars corrumpit effectus Jovis, quæ [illegible] Martis, Calor in signo æstivo augetur, [illegible] frigus propter Lunam [illegible] & est signum propinquissimum [illegible] in quadrato Aspectu Arietis, qui dominatur in Europa, &c. [illegible]

Now as unto the places which seem to be most concerned by the Effects of this said Conjunction, as being under the sign *Cancer*; they are much of the *Turks* Dominions. ——— The City of *Constantinople* in *Greece*, *Tunis*, and *Algiers* in *Barbary*, and other of the *Turkish* Territories, will (it's probable) in one kind or other, be highly sensible of the Malevolent influence of the same, to their great disturbance and damage, both as unto their Land and Sea Affairs —— Also the City of *Milan* in *Italy*, and its Confines and Territories; The *Muscovian* Countries, the Cities of *Venice*, *Magdeburgh*, *Wittenbergh*, are by *Astrologers* accounted to be under the aforesaid *Constellation*; besides some other places, as *Burgundy*, *Genoa*, *Cadiz*, and likewise much of the *Polish* Dominions. ——— It doth seem to import some considerable Action to be performed this Year, betwixt the *Poles*, *Muscovites*, *Turks*, and *Tartars* ——— And as *Cancer* is in *square* unto *Aries*, so some of those *Regions* and *Places* under that *Constellation* too, may be partaker in some respect or other, subject to its Powers; which *Astrologers* say are *Germany*, *Sweden*, *France*, *Denmark*, &c. ——— God keep the *Low-Countries* from all infectious Diseases, Casualties by Water, and all differences and disasters whatsoever, during the Effects of this *Constellation*: And also *Scotland*, the *North* and *North-East* parts of *England*, bordering upon the Sea, as *Yorkshire*, *Lincolnshire*, *Norfolk*, &c. And so I come unto the *Ingress* of the *Sun* into *Capricorn*, whole *Scheme* follows ——

And here by the way (before I go any further) I cannot but observe, how that all or most *Astronomers*, do commonly Account in every Year, the *Winter* Quarter to begin at that Moment of Time, when the *Sun* enters the first *Minute* of

Capricorn; which shall [illegible] now in there our (with us) about the 11 day of December making there (in these parts of the world) the shortest day and night in the Year. But we find by experience, and hath been observed more especially the last Year, that very truth, the *Spring* quarter of Season, with them first rise, and proper beginning, for by that time, the the last year was quite gone out of *Capricorn*, (or rather fore) the Bulbes, Trees, and Plants, &c. began sufficient to sprout forth, and the *Spring* considerably to appe and come on apace, which was before the middle of ary, yea indeed, presently after *Christmas*, in some pla here with us in the *South* and *South-East* parts of *England*,

casioned by the then mild and favourable Constitution of the Weather; and so we conceive it would every year do, did not the coldness most commonly of those times prevent and hinder it; so that in my opinion, the *Spring* hath naturally its very beginning, when the *Sun* enters *Capricorn*, though not much discerned or taken notice of, till he comes nearer unto us, and toucheth the first point of *Aries* (called the *vernal Equinox*), when it puts forth it self more vigorously and fully, and advanceth forward more speedily and visibly — for when the *Sun* enters *Capricorn*, he hath then finished his greatest *Southern* Inclination, and begins to approach towards us, who live on this side of the *Equator*, thereby infusing life (as we may say) by degrees, into all *vegetables*, which indeed, though it be most apparent when the *Sun* enters *Aries*, which is in *March*, yet it hath a being and measure, while he is in *Capricorn*; so that although the sign *Aries* may be reputed the *birth* of *vegetables*, yet *Capricorn* seems to be the true *conception* of them, as a very ingenious and learned person of our own Nation, some years since hath excellently argued. Insomuch, that it is most proper (as some conceive) for the year (*Astronomically*) to begin, not at the *vernal Equinox*, according to Custom, but rather at the reputed *Winter Solstice*, or *Ingress* of the *Sun* into *Capricorn*. The *Eastern* Countries following the latter *Romans*, did begin their Year (as *Origanus* tells us) at the *Calends* of *January*, which was not far distant from the *Winter Solstice*, for that *Solstice* was at the *Birth* of our *Blessed Saviour Christ*, *Anno Mundi* 3967. (as one hath very well observed) on the 25. day of *December*, though now it falleth out sooner by about 14. days.

This being briefly premised, I pass on (now) to the Consideration of the *Position* of *Heaven* at the *Sun's* aforesaid *Ingress* into *Capricorn*, being that in *December* 1680. last past.

Here we find the two *Superiour* Planets *Saturn* and *Jupiter* Retrograde, the one being in the 11. House in *Cancer*, the other in the 10. in *Gemini*: *Mars* is in the second House in *Virgo*, the *Sun* and *Moon*, *Venus* and *Mercury* in the 5. The

latter part of *Leo* is on the *Ascendant*, and the 18. degree of *Taurus* on the *Medium Cœli* ——— The Position of *Heaven* it self, seems not very rough, or of any harsh signification: nor are there any considerable *Configurations* of *Heaven* attending it, only the *Moon* is just going to the *Conjunction* of the *Sun*, and *Saturn* and *Mercury* are near unto an *Opposite* Aspect of each other —— So that for ought I can discover by the *Heavens*, the beginning of this year 1681. may prove pretty serene and quiet, and of a favourable disposition, as unto *humane Affairs* in the general, notwithstanding all reports and fears to the contrary ——

What is most observable, is the *Retrogradation* of the two superiours *Saturn* and *Jupiter* aforesaid, as it somesignifies in the World of great concernment, unto which those two Planets have relation, would be somewhat dubiously managed, and meet with many difficulties (and as we may say, go rather backward than forward) and those persons in the World represented by *Saturn* and *Jupiter*, perhaps will be subject unto many turnings and windings in their Affairs and Negotiations, to their detriment; their minds may prove unsetled, and subject to discontent, and dissatisfaction, —— and seeing that *Saturn* is in the 2d. House, it signifies, that the desires and hopes of those people and places signified by him, and under the *sign* wherein he is, will be frustrated and disappointed to their discomfort and grief: for when *Planets* are *Retrograde* at a *Revolution*, and *after Tuglesi*, &c. ——— they are accounted by *Astrologers*, to be of an unpleasant nature, and of no propitious signification, as unto those persons, Countries and Things concerned by them. *Berbon* saith in his *Centiloquium*, Aphorism the second, that a Planet *Retrograde*, is as a Man infirm, stupified, and sollicitous ——

The *Position* of *Mars* in the *second* House, seems to be disliked, in regard his influence seems thereby to be of ill consequence unto those things signified by that House: from hence it may be feared, that in divers parts of *England*, many notorious Robberies will be committed, breaking open of Houses, and much Thieving and purloining, in the Months of

of *January* and *February* of this Year; whereby many people may ſuffer much detriment and loſs: and this is the more confirmed, by the *Oppoſition* of *Saturn* and *Mercury* — *Quando Mercurius in ſecundo, ortus furta & prædationes multæ in bonorum, & ſervorum domos latrones & prædones, — & illi qui habent res in dubio, fundi committent, & homines habebunt inopes vitas, & accidet ex multa malitia ac impoſitiones tributorum.* Haly. Com. de Judic. Aſtro. Beſides, the aforeſaid *Oppoſition* of *Saturn* and *Mercury* imports, that there will be many various reports, and much falſe news, in the aforeſaid *Months*, concerning the *publick affairs* of thoſe times; and lying, ſeditious, and ſcandalous Pamphlets, and Papers (perhaps) will be diſperſed abroad in ſome places; for which the *Authors* and *Promoters*, will come under the ſevere laſh of *Authority* —— Alſo ſome ſturdy and rough *weather*, may now and then happen at Sea, or *Piratical* Actions in the aforeſaid *Months*, to the loſs of ſome Merchants, *&c.* and very *cold weather* (if not much *ſnow*) at the *beginning* of the *year*, and ſo I *proceed* in the next place to ſpeak ——

Of the *Eclipſes* in this preſent *Year* 1681.

THere will be four *Eclipſes* in this *Year*, *viz.* two of the *Sun*, and as many of the *Moon*, whereof only one of them will be ſeen in our *Horizon*, and that is the latter *Eclipſe* of the *Moon*, of each of which in Order ——.

The *firſt* will be of the *Moon*, on the 22. day of *February*, about our 11. of the *Clock* in the *forenoon*, to be ſeen of our *Antipodes*, &c. ——

The *ſecond* will be of the *Sun*, on the 10. day of *March*, about our one of the *Clock* in the *Morning*, and will alſo appear to thoſe that inhabit our *Antipodes*, and ſo not to be ſeen by us.

The third *Eclipſe* is of the *Moon*, on the 19. day of *Auguſt*, and will prove a very conſiderable *Eclipſe*, and *viſible* here

with us in England (if the Air be serene and clear)

The beginning thereof will be at 43. minutes after Mid-night ——

The Middle or greatest Obscuration, at 24. minutes past 2. in the Morning.

The end thereof at 4. minutes past 4. in the Morning.

The Total Duration will be 3. hours and 24. minutes.

The Digits Eclipsed 10. D. and 33. Minutes.

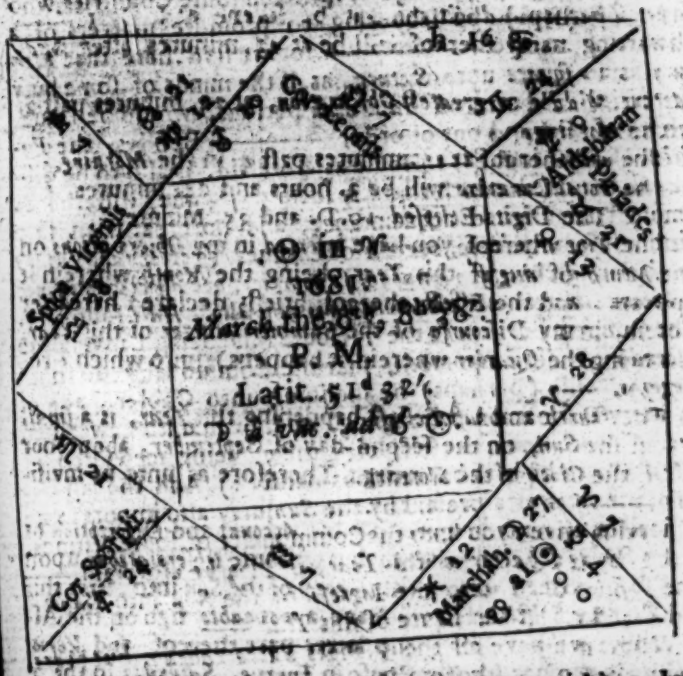
The Type whereof you have inserted in my Observations on the Moneth of August this Year, being the Month wherein it appears: and the Effects thereof briefly declared hereafter herein, in my Discourse of the Summer quarter of this Year, (as being the Quarter wherein it happens) unto which I refer you ——

The fourth and last Eclipse happening this Year, is a small one of the Sun, on the second day of September, about one of the Clock in the Morning: Therefore as unto us invisible ——

Having given you here, a short Account and Description of the Eclipses; I come now to deliver some Observations upon the Position of Heaven, at the Ingress of the Sun into Aries this Year 1681. Wherein we have a moveable sign on the Ascendant, namely Libra, the latter part thereof, and Venus Lady thereof, in the 7. House in Taurus, Saturn is in the 9. House, Mars in the 11. in Virgo, Jupiter in the 8. in Gemini, the Sun and Moon in the 1. the Moon being in the latter end of Pisces, and Mercury is in the 6. House, in the 2. degree of Aries; from whence it appears, that a moderate time may be expected to happen, as unto the publick affairs of divers Countries, in this quarter of the Year, viz. the Spring, and Months of March, April, and May: for when at the Revolution of the Year, the Heavenly Bodies shall be mildly posited, and under no ill Aspects (and such as are accounted of no turbulent and contentious nature) it doth seem to manifest and declare, that the Actions and Publick Concernments of the World (for the most part) will be moderately and quietly carried on.

We do observe, that the Moon is void of Course at the

Revolu-

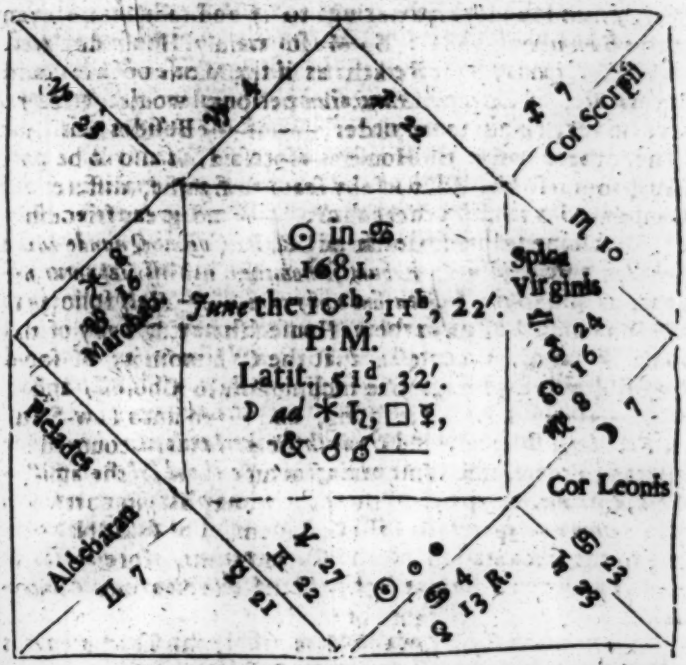


Revolution, and also in conjunction, she being within 3 degrees of the Body of the Sun, or *Conjunction* with him, and this is the only *Numerical Configuration* attending this said *Revolution*, of the Superior Planets. Nor do we meet with any *Configurations* besides, of any great consequence at this time, for the truth is, at this *Revolution* there happens a *sextile Aspect* betwixt *Jupiter* and *Mercury*, and *Saturn* and *Venus*; and these *Aspects* being of a *friendly* and *amicable* disposition, they seem to import, that some people will be sincerely endeavouring for Unity and Concord, and be of a mild carriage and behaviour; and that the *Transactions* of the Months aforesaid, will (in all probability) be pretty calmly and smoothly managed: Notwithstanding the surly and perverse

verse temper of some unquiet Spirits in some Countries, who may (perhaps) be labouring to promote matters of a thwarting nature ——— for we find here that *Mercury* is in *square* unto *Saturn*, as if the minds of some busy *Mercurial*, and rugged *Saturnian* persons, would be somewhat unsetled and out of order ——— Besides, the *Position* of *Mars* in the 11. House as aforesaid, is also to be disliked, because he doth thereby seem to signifie, differences amongst friends and acquaintance, and no great friendship amongst some people, breach of Leagues, *&c. Quando Mars fuerit in undecima, non amabunt se homines, nec associabuntur, nec habebunt amorem aut pietatem unus cum alio. Haly* folio 371. The Position of *Venus* in the 7. House (she being Lady of the *Ascendant*) also importeth, that the Commonalty of some *Regions*, will (perhaps) be inclining unto Choler, and of an angry Disposition, wrangling, and given unto Law-Suits, *&c.* (That House it self, *viz.* the 7. being accounted by *Astrologers* to be of a contentious nature:) And the affliction of the *Moon* as aforesaid by the *Sun*, may also import some difficulties to happen unto the Commonalty of some Nations, in the *Spring Quarter* of this *Year*, or *Months* aforesaid —— And so I proceed unto the *Ingress* of the *Sun* into *Cancer*, and *Summer Solstitial* figure of this *Year* ——

Where we have all the Planets *Subterraneous*, but *Mars*, and he is also not far from it —— The *Moon* and he being in the 7. House in *Virgo* — *Saturn* is in the sixth House, the *Sun* and *Venus* in the 5. and *Jupiter* and *Mercury* in the 4. —— Thus are the *Heavens* disposed at the *Ingress* of the *Sun* into *Cancer* this *Summer*, 1681. and some considerable *Aspects* of the *Planets* do happen at, and presently after this *Ingress* of somewhat a busy nature, for *Mercury* is in *square* of *Mars*, and is also going to the *Conjunction* of *Jupiter*; and *Mars* and *Jupiter* are in *square* to each other, and *Venus* by a *Retrograde* Motion comes to the *Conjunction* of the *Sun*. Besides, *Mercury* having about four or five days after the said *Ingress* got into *Cancer*, he then presently comes unto the *Conjunction* of the *Sun* and *Venus*; and not long after to the *Conjunction* of *Saturn* also. ——

These



These said *Configurations* seem to be of some importance, and of very *material* signification, as unto the Transactions of this *Summer Quarter*, and Months of *June*, *July*, and *August*. Yet for as much as most of the Planets as aforesaid, are under the Earth at this said *Summer Solstitial Ingress*; The actions and Consultations of this *Summer Quarter* of this *Year*, seem signified to be for the most part occultly and clandestinely managed. *However*, some very *material actions* may happen in some parts of *Europe*; and the Souldier will be active (perhaps) and much imployed; and its probable from hence, that there will happen the besieging of Towns, Castles, and strong holds, &c. Rumours of War, Skirmishes, and Commotions in many of those places under the

the *Constellations* of *Gemini* and *Virgo*: and also many Robberies, &c. and sundry debates of a hasty and rash nature, even in this *Summer* of 1681: So *Mars* in the 7. House declares.

Besides, it may be feared that sundry Diseases of a hot and dry nature, as the small Pox, Measels, violent Fevers, &c. may be very rife in some places, if not the *Plague* itself, or some other violent distemper ——— Also there will be perhaps, some stir or discourse about religious matters, and Consultations tending thereunto ——— and it may be feared, that some violent storms of *Hail* and *Rain*, with much *Thunder* and *Lightning* will now and then in this *Quarter* appear, as also some *sudden fires*, &c. ——— detrimental to the Inhabitants of those places where they happen. And some *Wheat* upon the *ground* (perhaps) may be damaged by *Mildews*, *Lightnings* or *sudden Showrs*, which God prevent ———

Flanders, *Brabant*, and *Spanish Netherlands*, *London*, some parts of *France*, the West of *England*, *Scotland*, *Holland*, *Zealand*, *Lorrain*, &c. perhaps may be somewhat concerned in this *Summer Quarter* of 1681. in one kind or other, according to the signification of the *Configurations*, and *Position* of the *Stars*, at this present *Ingress* of the *Sun* into *Cancer* aforesaid.

And now the *Eclipse* of the *Moon* visible this *Year*, towards the latter end of this *Quarter*, ought also to be here considered, viz. that of the 16th of August before-mentioned; the rather because it is a very considerable *Eclipse*: The *Moon* being very near the time totally *Eclipsed*.

This *Eclipse* happens also in the 3. degree of *Pisces*, and is likewise most strong in the 7. House ———

We have examined this *Position* of the *Stars* at the middle time of greatest obscuration thereof, and do find, that *Saturn* is then newly got into the 10. and *Jupiter* is entred at the 23. degree of *Cancer*. The *Effects* of this *Eclipse* will not suddenly operate, because it happens in the *West Angle*. It may be feared that the *Planets* may be posited in a contentious nature, in regard of their *Aspects* in that *Angle*: and seeing it is in the watry *Triplicity*, and *Jupiter* also, who

is ruler of the Sign *Pisces*, wherein the *Eclipse* happens, is also in a sign of that *Triplicity*, it seems to import, that its Effects will have much relation unto the Sea, and Sea Affairs. *Proclus* saith, That an *Eclipse* of either *Luminary* happening in the *Watry Triplicity*, (as this doth,) signifieth the Death of the Ignoble and common people, Troubles, Seditions, Wars, great Death of Fishes, Water Fowls, and of other Creatures living in the Waters: dammage unto *Navigators*, and such as are employed at Sea, or in Sea Affairs: and seeing it falleth in the *West Angle* as aforesaid, it hath also relation unto *Laws* and *Customs*, and the *Alteration* of them, it hath also the signification of Merchants, Retails, &c. and in regard *Jupiter* is Lord thereof, it may import further, many debates about Religion, or amongst religious persons: various and many Messengers and Letters and Journeys, sudden and unexpected Deluges or Inundations of Rivers, and Waters, overflowing the Sea Banks in some Countries: Some prejudice in the Fishing Trade, or unto Fishermen, &c. ——— And so I come in the last place, to the 4. and last *figure* herein to be considered, and that is of the *Autumnal Quarter* of this Year.

Herein we find the two *superiour* Planets *Saturn* and *Jupiter* in the 9. House, and also *Venus*. And *Mars* is very strong in *Scorpio* in the 10. The 9. degree of *Capricorn* ascends —— Being confined to three sheets of Paper, I cannot enlarge much upon this *Autumnal Quarter*, only I do observe, that in regard of the situation of the two *Superiour* Planets in the 9. House, as aforesaid; That some Nations and people in this *Quarter*, or Months of *September*, *October*, and *November* will be contriving, (perhaps) to manage and carry on some very material matters relating unto martial concernments and controversies: and some persons will be of a contentious disposition, &c. ——

Saturn is now got into the 4. degree of *Leo*, and the *Conjunction* of him and *Jupiter* in that *Constellation* draw on a pace. This coming of *Saturn* into *Leo*, seems to be of very great consequence, and importeth the Death of many Aged people —— and that many of those places under the sign *Leo*, will

will be much feasible of his Influences, but more in the succeeding years then in this, especially after the Conjunction of Saturn and Jupiter therein before-mentioned; of which (if God spare my life) some Account shall be given by me hereafter, in my future Annual Observations.

And now having there been supposed some very considerable sad and strange Accidents in the Year 1680. past, in sundry parts of Europe, by Thunder and Lightning; I will here briefly mention them, as I had them related in the London Gazette, they being very Remarkable.

About the middle of June in 1680. aforesaid (Stylo Novo) the Great Tower of Cracow in Poland was burnt with Lightning.

About

About the last week of the same Month, Passengers coming from Lubeck and Pomeren, to Hamburgh reported that they saw (then) in the Air, several trails of fire. To which some added the shooting of many great Fireballs, which breaking in pieces fell to the Earth.

About the first week in July (New stile) two Souldiers in Venice were killed, and three others very much wounded with a flash of Lightning.

On the 24. of the same Month, viz. July, there was great Thunder and Lightning at Rousdeck, a considerable Town in Holland: where the Lightning in the Night having pierced the Wall of the great Tower, wherein was kept a great Quantity of Powder, the Castle and greatest part of the street adjoining, were blown up; a great number of People destroyed. Two Churches ruined, with about half the houses in the Town. The damnages being accounted greater than what they suffered at Delf in the Year 1654.—

But that which is most to be wondred at, is, that which happened in England, on the 26. day of June 1680. near Newton Stewart, a Town in the Province of Ulster; which was this: viz. On Saturday the 26. day of June about ten of the Clock in the Morning, there was heard there much Thunder, which 15. Miles from thence made many great breaches in a Mountain, and such spouts of Water fell from the places so broken up, that the flood hurried the loosened Earth with it to the bottom, and swelled a Brook that falleth into a River near that place, so suddenly and so high, that it carried away all that stood before it. The people who lived near the Bank, had not time to get out of their Houses, but with Goods, Houses and all, were swept away and perished. The Lands that lay near it were lost; The very Fish were filled with the Mud, which the current brought with it. Great Quantities of Salmon, of Trouts, of Lampreys (which were seldom or never seen there before) even the Eels that live in mud, were chokt by this, and thrown dead upon the shore, and as it was believed, there was not one fish left alive in the River from the Mountains to the Sea. Some that out of curiosity went to see the Mountain, were

amazed

he low ground by the River for ten Miles to
d with the ruines, and the Corn fields buried. There
in several places fifty persons — And
le —

he truth is, it may very well be remembred, That
Years Almanack, viz. of 1680. I did hint, that
ualties by Thunder and Lightning were signified
s, to happen in the Months
